

## Investment Objective

The **Symmetry U.S. Ultra Value SMA** is a quantitative, rules-based portfolio that focuses on large-cap U.S. equities with relatively lower valuations.

## Understanding the SMA Investment Strategy

Drawing on decades of data and extensive academic research — and Symmetry's own — the U.S. Ultra Value SMA is grounded in evidence and financial science.

Symmetry seeks to harness the power of markets via strategic exposure to factors identified by academic research as offering the potential for higher returns over time (or reduced risk). This strategy primarily focuses on the Value factor, but may also capture some of the Profitability/Quality premia.

- Portfolio focus on the cheapest stocks in the S&P 500 Index universe from a valuation perspective
- Constructed from approximately 50 individual equities
- Portfolio does not provide full exposure to the U.S. equity market and rebalances semi-annually

Symmetry's *investment team of CFA® charterholders and analysts* is guided by fundamental investment principles applied thoughtfully and with intellectual rigor. The team brings almost three decades of experience building Evidence-Based investment solutions and models, such as this SMA, using a process-driven approach backed by a unique, integrated technology engine. **The team also has substantial trading and tax optimization expertise.**

## Who Is This Strategy For?

Designed as a complementary portfolio, the Ultra Value SMA may be suitable for investors seeking an increased tilt to the U.S. equity value factor. Typical investors in this portfolio are seeking long-term growth, have a minimum investment time horizon of 10 years, and are willing to accept significant price volatility and large tracking error to the portfolio's market capital weighted benchmark.

## **Risk Disclosure**

Higher potential return generally involves greater risk, short-term volatility is not uncommon when investing in various types of funds. Environmental, Social and Governance (ESG) Investing Risk; ESG investments may not be perfectly correlated to the broader market indexes they seek to replicate. Stocks screened by the index sponsor for ESG criteria may underperform the stock market as a whole or particular stocks selected for the Index will, in the aggregate, trail returns of other funds investment strategies screened for ESG criteria. The components of the Index are likely to change over time.

## **Panoramic Direct Indexing Program Risks**

The Symmetry Panoramic Direct Indexing program provides clients with individual security portfolio solutions designed around individual client preferences. The Panoramic Direct Indexing separately managed accounts (Panoramic Direct Indexing SMAs) can be index- or factor-based. The index-based solutions are designed to give clients exposures similar to popular market indices, with far fewer individual security positions. The factor-based solutions are designed to emphasize those factors. The Research/Portfolio Management team believes will optimize risk-adjusted return. Both the index-based and factor-based portfolios hold individual securities.
